

# ADX-12 SKYGUARD

# ADX-12 SKYGUARD

The ADX-12 SkyGuard™ is a purpose-built Counter-UAS tactical platform designed to counter the growing threat of low-altitude drones and unmanned aerial systems (UAS). Developed as a rapid-response solution, the platform combines portability, modularity, and mission adaptability to provide effective short-range aerial threat interdiction. It is intended to bridge the gap between traditional small arms, electronic counter-UAS systems, and larger air-defense assets, offering operators a flexible tool for modern drone defense operations.

## ADX-12 SkyGuard™ Specification

- Platform Name ADX-12 SkyGuard™
- Type Counter-UAS Tactical Platform
- Intended Role Short-range aerial threat interdiction
- Primary Mission Neutralization of low-altitude drones(UAS)
- Deployment Rapid-response portable platform
- Configuration Modular tactical configuration
- Architecture Mission-adaptable design
- Optical System Integrated top-mounted optical interface
- Support System Folding / telescopic support assembly
- Magazine System Detachable magazine configuration
- Accessory Mounting External accessory zones
- Mobility Portable field deployment
- Operating Environments Tactical overwatch
- Design Philosophy Modularity, mission-driven operation
