

# HG-415 CARBINE

# HG-415 CARBINE

The HG-415 Carbine is a compact 5.56×45mm NATO tactical rifle engineered for modern military and law-enforcement operations. Featuring a 10.5-inch barrel, fully ambidextrous controls, STANAG magazine compatibility, and a free-float M-LOK handguard, it delivers exceptional maneuverability and modularity in confined environments. Its lightweight construction, folding stock, and optics-ready Picatinny rail make it well-suited for special operations, urban missions, vehicle crews, and rapid-response forces.
